Calculation of SGPA/CGPA

SRM UNIVERSITY – Delhi NCR, follows credit systems for evaluation/grading in all subject(s)/Course(s) across all departments/faculty.

Student is issued a Grade card at the end of each Term/Semester, reflecting SGPA, with following letter grades & grade points as indicated:

Range of Marks for Grade/Points

Range (Marks)	90-100	80-89	70-79	60-69	50-59	40-49	0-39
Grade	S	A	B	C	D	E	F
Grade Points	10	9	8	7	6	5	0

Calculating SGPA:

Semester Grade Point Average (SGPA) essentially reflects a student's performance over a semester.

Here are the steps explaining to calculate SGPA:

Step1) Add all the Credit points across all the subjects in the semester. **(Suppose Y)**

Step2) Multiply the credit point of each subject to the grade point you have earned in the subject, and add. **(Suppose X)**

Step3) Divide this sum by the total sum of credit points of the semester to get SGPA=**(X/Y)**

Calculating CGPA:

CGPA reflects the overall performance of a student throughout their entire academic program.

Here are the steps explaining to calculate CGPA:

Step1) Add all the total Credit points in all the subjects across all the semesters. **(Suppose Y)**

Step2) Multiply the credit point of each subject to the grade point you have earned in the subject across all the semesters, and add. **(Suppose X)**

Step3) Divide this sum by the total sum of credit points across all the semesters to get CGPA= **(X/Y)**
